

Taking aim at IDH1 mutations to improve outcomes in AML

SPEAKER

Dr Andre SCHUH

Princess Margaret Cancer Centre

Dr Andre Schuh is a staff physician at the University Health Network/ Princess Margaret Cancer Centre, Toronto, ON. He served as head of the leukemia program at Princess Margaret from 2010–2014, and as medical director, malignant hematology from 2012–2018. He obtained his medical degree at the University of Toronto, and thereafter received subspecialty certification in internal medicine and in hematology, followed by a 4-year molecular biology fellowship. Dr Schuh's current interests include acute leukemia management and clinical trials (especially in the older patient), myelodysplastic syndromes, and the development of province- and country-wide leukemia management strategies.
