SPEAKER

Prof Thomas Seufferlein, MD, PHD

*Medical Director, Clinic for Internal Medicine I
University Hospital Ulm, Germany*

Prof Thomas Seufferlein obtained his doctorate at the Klinikum Rechts der Isar of the Technical University of Munich. In addition to heading the Clinic for Internal Medicine I at the University Hospital Ulm, Prof Seufferlein is chair of the Committee for Cancer Prevention of the German Cancer Aid organization and spokesperson for the Oncological Guidelines Program of the DKG, German Cancer Aid, and the AWMF. The main focus of Prof Seufferlein's scientific work in the clinical and basic scientific fields is gastrointestinal tumors, in particular, pancreatic cancer. ●

SPEAKER

Prof Gerald Prager

Associate professor of oncology, Head of the Gastrointestinal Cancer Program, Medical University of Vienna, Austria

Prof Prager is the director of the GI Cancer Program of the Department of Medical Oncology at the Medical University of Vienna and Comprehensive Cancer Center, Vienna. He leads the Unit for Precision Medicine in Cancer and is an associate professor of medicine, board certified for internal medicine, hematology, and medical oncology. Prof Prager graduated from the Medical School of the University of Vienna and completed his postdoctoral training at the University of California, San Diego, USA and was a visiting professor at the Norris Cancer Center, University of Southern California, Los Angeles, USA in 2011. Prof Prager's main research interests focus on translational research and (tumor-) angiogenesis and his work was honored by more than 20 international awards and published in highly renowned international journals. Prof Prager is also a member of the ESMO Scientific Committee. ●
